OBJECTIVE:

To work in a challenging team-oriented environment where I can enrich my skills and knowledge for the benefit of my organization and for my own professional growth.

SKILLS:

- Selenium WebDriver
- Core Java
- Cucumber, TestNG
- POM, Junit
- Maven
- JIRA
- Jenkins
- GIT
- Agile Scrum
- Test case planning
- Test case execution
- Bug Track & report

EDUCATION:

M Com.,from Periyar University, Salem.

Project 1 Description:

Kmart Corporation is an American Retail company that owns a chain of big-box department stores. The company was incorporated in 1899 as Kresge Corporation and renamed as Kmart corporation in 1977.

EXPERIENCE:

Working as Software **Test Engineer** in **TGK Streamline Solutions Pvt., Ltd.**, from August 2021 to till date.

CORE COMPETENCIES:

- **4.8 years of experience** in Software Testing, including both **Automation and Manual Testing** using **Selenium WebDriver with Java**.
- Domain experience in **Travel** and **E-Commerce** applications.
- Hands-on experience in **Mobile Testing** using **Appium**.
- Strong expertise in automation frameworks such as **Cucumber (BDD)**, **JUnit**, **Page Object Model (POM)**, and **Data-Driven Frameworks**.
- Experience in using **Maven** as a build management tool and **Jenkins** for **CI/CD** integration.
- Proficient in **defect tracking and reporting** using **JIRA**.
- Extensive experience in **version control** using **Git**.
- Skilled in executing various testing types, including **Smoke**, **Sanity**, and **Regression Testing**.
- Active participant in all **Agile Scrum ceremonies**, including Sprint Planning, Daily Stand-ups, Sprint Reviews, and Retrospectives.
- Experienced in **cross-browser and cross-platform testing** using cloud-based platforms like **BrowserStack**.
- Strong knowledge of **API Testing** using the **REST Assured** framework.
- Capable of analyzing **API requirements** from API documentation (Swagger/OpenAPI) and user stories.
- Hands-on experience in performing **HTTP methods** such as **GET**, **POST**, **PUT**, and **DELETE**.
- Proficient in validating **HTTP status codes** (e.g., 200, 201, 204, 400, 401, 404, 500) as per API specifications.

PROJECT PROFILE:

PROJECT 1: K MART

Apr 2023 – Till Date

Domain	E-Commerce
Testing approach	Automation
Tools used	Selenium WebDriver with Java
Framework	Cucumber
Defect tracking tool	JIRA

Responsibilities:

- Participated in **test planning**, analyzing **user stories** and **acceptance criteria** to ensure comprehensive test coverage.
- Identified **end-to-end business scenarios** and designed detailed **test scenarios and test cases**, including candidates for automation.
- Categorized test cases into **Smoke**, **Sanity**, **Regression**, and **Functional** suites to support efficient test execution.
- Developed **automation scripts** using **Selenium WebDriver with Java** and the **Cucumber (BDD) framework**.

Project 2 Description:

Flynas, formerly Nas Air, is a private Saudi low-cost airline "joint-stock company". It operates more than 1,500 flights per week, which serve more than 70 domestic and international destinations in the Middle East, Asia, Europe and Africa.

Declaration:

I hereby declare that all the above information is true to the best of my knowledge

- Implemented automation frameworks from scratch, including the Page Object Model (POM) and Data-Driven Frameworks, enhancing reusability and maintainability
- Created **BDD feature files** using **Gherkin syntax** and developed corresponding **step definitions** for behavior-driven testing.
- Demonstrated strong understanding of **API documentation** (e.g., Swagger/OpenAPI) and user stories for effective API test design.
- Validated **XML and JSON responses** using **JSON parsers** and schema validation techniques.
- Executed **regression test suites** and generated execution reports through **Jenkins**, enabling **Continuous Integration (CI)**.
- **Logged, tracked, prioritized, and verified defects** using **JIRA**, ensuring timely closure through collaboration with development teams.
- Maintained and updated **test cases** and defect details within **JIRA** or associated test management tools.
- Managed and safeguarded automation code using **Git**, including activities such as **branching, merging, and pull requests**.
- Performed **web and mobile application testing** using **BrowserStack**, enabling cross-browser and cross-device validation.
- Executed **mobile automation testing** for **web and native applications** in cloud environments using **BrowserStack** integrated with Selenium and Cucumber.
- Collaborated with **cross-functional teams**, including developers, business analysts, and product owners, within an **Agile Scrum** environment.

PROJECT 2: Flynas

Aug 2021 – Apr 2023

Domain	Airlines
Testing approach	Manual & Automation
Tools used	Selenium WebDriver with Java
Framework	TestNG
Defect tracking tool	JIRA

Responsibilities:

- Analyzed **Business Requirement Documents (BRD)** and collaborated with the **Business Analyst (BA)** to clarify requirements and resolve ambiguities.
- Prepared and reviewed **Test Plans, Test Scenarios, and Test Cases** with the team to ensure comprehensive test coverage.
- Executed **manual and automated test cases** using the **TestNG framework**.
- Developed **reusable methods and utility functions** to enhance the maintainability and scalability of automation scripts.
- Logged, tracked, and managed **defects using JIRA**, ensuring timely resolution and closure.
- Actively participated in all **Agile Scrum ceremonies**, including **Sprint Planning, Daily Stand-ups, Sprint Reviews, and Sprint Retrospectives**.
- Prepared and shared **Test Execution Reports** and **Defect Summary Reports** with the team and management.
- Updated and maintained **test cases and defect records** within **JIRA** or associated test management tools.
- Documented **testing processes, execution steps, and results** to ensure knowledge sharing and audit readiness.
- Communicated effectively with the **Test Manager and stakeholders**, providing timely updates during status meetings.
- Reviewed **daily build failures**, captured screenshots of issues, documented findings, and shared detailed reports with the **client** for prompt action.
