

CHIRAG

AI / ML ENGINEER, 12+

Summary:

AI Engineer and Technical Architect with 12+ years of software engineering experience designing and delivering enterprise AI platforms, healthcare applications, AI agents, and cloud-native products. Specialized in building production-ready AI systems using LangGraph, LLMs, Prompt Engineering, RAG architectures, AI workflow orchestration, and intelligent automation. Led end-to-end development of healthcare AI products across Malaysia, Singapore, Australia, and the UK. Successfully delivered 50+ production applications spanning Healthcare, AI, SaaS, Marketplaces, Compliance, Logistics, Education, and Enterprise Automation. Strong background in product ownership, solution architecture, backend engineering, scalable APIs, cloud deployment, and AI-driven user experiences.

SKILLS

AI & Machine

Learning: LangGraph,
AI Agents, OpenAI APIs,
LLM Integrations,
Prompt Engineering,
RAG Architecture, AI
Workflow Automation,
Structured Outputs,
Function Calling, Multi-
Agent Systems, AI
Product Development,
AI-powered
Recommendation
Systems

Backend Engineering:

Python, Node.js,
Express.js, REST APIs,
Microservices,
Authentication,
Background Workers,
API Integrations,
Serverless Functions

EXPERIENCE

WITQUALISTECHNOLOGIES PVT LTD

(CURRENTLY)

As AI / ML Engineer

OTHER ORGANIZATION

Different Roles

PROJECTS

NI Healthcare (Malaysia)

AI Product Owner | Technical Architect

Owned the complete product lifecycle and technical architecture for an enterprise Healthcare AI platform developed for one of Malaysia's leading healthcare technology organizations.

Responsibilities:

- Owned product roadmap and technical architecture
- Led AI solution design
- Managed engineering execution
- Worked directly with healthcare stakeholders
- Designed scalable healthcare workflows
- Built an enterprise Full Body AI Report Generator
- Developed a sophisticated AI Agent using LangGraph
- Generated Comprehensive Health Reports (CHR) from thousands of biomarkers

Frontend: React,
Next.js, TypeScript,
JavaScript, Tailwind CSS,
HTML5, CSS3

Databases:
PostgreSQL, MySQL,
Supabase, Xano

DevOps & Cloud: Git,
GitHub, Railway, Vercel,
CI/CD, Docker,
Deployment Pipelines

EDUCATION

MBA – Information
Technology SVKM's
Narsee Monjee Institute
of Management Studies
Bachelor of Management
Studies University of
Mumbai

- Built intelligent AI workflows capable of analysing large health datasets
- Implemented prompt engineering for medical report generation
- Designed healthcare automation pipelines
- Built scalable backend architecture supporting AI-generated reports
- Developed explainable AI outputs for healthcare professionals and patients
- Optimized report generation workflows through AI orchestration

Technologies:

- LangGraph
- OpenAI
- LLMs
- Prompt Engineering
- AI Agents
- Workflow Automation
- PostgreSQL
- REST APIs
- Healthcare Data Processing

StrongBody Ai (Singapore)

AI Solutions Architect Built an enterprise healthcare marketplace serving healthcare providers, vendors, and patients.

Responsibilities:

- Designed marketplace architecture
- Built backend systems
- Developed AI onboarding experiences
- Implemented intelligent recommendation engines
- Built complete multi-vendor marketplace
- Designed AI-powered onboarding
- Developed intelligent health recommendations
- Automated vendor onboarding
- Built scalable healthcare workflows
- Integrated AI suggestions into user journeys
- Designed marketplace transaction systems
- Built enterprise-grade backend architecture
- AI Agents
- OpenAI
- Workflow Automation
- Marketplace Architecture
- REST APIs

- PostgreSQL
- Next.js
- Node.js

Nourished Plus (Australia)

<https://apps.apple.com/au/app/nourished-plus/id6711333005>

Nourished Plus is the AI-powered companion application for Nourished Health. The application helps women affected by PCOS by providing AI-powered recommendations and scientifically backed health guidance.

Key Contributions:

- Built AI recommendation engine
- Developed science-backed AI responses
- Integrated healthcare content into AI workflows
- Built personalized health guidance
- Connected Shopify commerce with AI
- Improved customer engagement using AI-generated recommendations

Technologies:

- OpenAI
- LLMs
- Prompt Engineering
- Shopify
- Next.js
- Node.js
- REST APIs

RiverX

AI-powered SaaS application builder capable of generating complete applications using multiple LLM providers.

Highlights:

- Multi-model AI architecture
- AI code generation
- AI Agent workflows
- Real-time application generation
- Automated deployments
- Intelligent project editing

ComplyAssist

Enterprise compliance automation platform.

Highlights:

- AI-assisted compliance insights
- ERP workflows
- Secure document processing
- Automation-heavy backend

ChampionBets

Australian Sports Betting Platform

Highlights:

- Platform modernization
- High-volume member management
- Performance optimization
- Workflow automation
