

SUJAI

SALESFORCE DEVELOPER, 7+

Summary:

- Around 7+ years of experience in Salesforce CRM development, customization, integration, and support across Sales Cloud and Service Cloud implementations.
- Strong hands-on expertise in Case Management, Entitlement Management, Milestones, SLAs, Escalation Rules, OmniChannel Routing, and Agent Console for enterprise customer support operations.
- Solid experience in Quote Management, Territory Management, and Sales Cloud configuration supporting end-to-end sales and service processes.
- Strong experience in Salesforce Service Cloud, Experience Cloud, and customer-facing digital solutions.
- Knowledge of Salesforce B2C Commerce concepts, e-commerce workflows, customer journeys, and API-driven integrations.
- Hands-on experience in Apex Classes, Triggers, Batch Apex, Queueable Apex, Schedulable Apex, Lightning Web Components (LWC), Aura Components, and Visualforce.
- Proficient in integrating Salesforce with enterprise systems (ERP/Billing/IAM) using REST/SOAP APIs, Apex Callouts, Platform Events, Change Data Capture (CDC), and Named Credentials.
- Experience in large-volume Data Migration using Bulk API and Data Loader.
- Strong understanding of Salesforce security (Roles, Sharing Rules, Permission Sets, SSO), deployment, and release management using Git, Salesforce DX, Flosom, and CI/CD tools (Gearset/Copado/Jenkins/Azure DevOps).
- Experienced in production support, performance optimization, bug fixing, and system enhancements.
- Skilled in Agile/Scrum methodologies, requirement gathering, client interaction, development, testing, and deployment activities.
- Salesforce Certified Platform Developer I, AI Associate, and AI Specialist with strong problem-solving and communication skills.

SKILLS

Sales & Service Cloud:

Quote Management,
Territory Management,
Opportunity Management,
Case Management,
Entitlement Management,
Milestones, SLAs,

EXPERIENCE

CONFIDENTIAL

As Salesforce Developer

- Developed and supported Salesforce Sales Cloud and Service Cloud solutions based on business and client requirements.
- Implemented Case Management features including Entitlement Management, Milestones, SLAs, Queues,

(CURRENTLY)

Escalation Rules, Omni-Channel Routing, Service/Agent Console, Queues, Assignment Rules, Email-to-Case

Salesforce

Development: Apex Classes & Triggers, Batch/Queueable/Schedulable Apex, LWC, Aura Components, Visualforce Pages & Controllers, Salesforce Flows, Process Builder, Approval Processes, SOQL, SOSL, Custom Metadata Types

Integration &

Platform: REST/SOAP APIs, Apex Callouts, Named Credentials, Platform Events, Change Data Capture (CDC), External Services, Bulk API, Large Data Migration

Security &

Administration: Roles, Sharing Rules, Permission Sets, Profiles, SSO, User Management, Custom Objects, Record Types, Page Layouts, Validation Rules, Data Import Wizard, Data Loader, Duplicate Rules

DevOps & Tools: Git, GitHub Actions, Salesforce DX CLI, Flosum, Change Sets, CI/CD (Gearset/Copado/Jenkins/

Assignment Rules, Escalation Rules, and Email-to-Case functionalities.

- Configured Quote Management and Territory Management to support end-to-end sales and account management processes.
- Worked extensively on Service/Agent Console and Omnichannel Routing to improve customer support processes.
- Designed and developed Apex Classes, Triggers, Batch Apex, Queueable Apex, Schedulable Apex, and Lightning Web Components (LWC).
- Built and maintained automation using Salesforce Flows for business process optimization.
- Developed REST and SOAP API integrations, Platform Events, and Change Data Capture (CDC) with external systems and enterprise applications (ERP/Billing/IAM). Sujai MP Salesforce Developer
- Worked on Experience Cloud portal customization and customer self-service solutions.
- Managed Roles, Sharing Rules, Permission Sets, and SSO configuration to support enterprise security requirements.
- Handled large-volume data migration using Bulk API and Data Loader.
- Managed deployments and release activities using Git, Salesforce DX, Flosum, and CI/CD tools (Gearset/Copado/Jenkins/Azure DevOps).
- Collaborated directly with clients for requirement gathering, analysis, testing, and support activities.
- Provided production support, issue resolution, bug fixing, and enhancement development.
- Participated in Agile development processes, including sprint planning, daily stand-ups, and code reviews

PROJECTS

Client: WIS Mortgages and Insurance Services

Role: Salesforce Developer

Domain: Mortgage and Financial Services

Azure DevOps), Apex
Test Classes, Code
Coverage (75%+),
Performance Optimization

AI & Automation:

Einstein AI/Bots,
Salesforce AI capabilities;
exposure to MuleSoft for
enterprise integration

Specialist

EDUCATION

Bachelor of Engineering in
Computer Science and
Technology from
Karpagam College of
Engineering, Coimbatore,
India. (CGPA: 8.7)

- Developed and optimized Apex classes and triggers to integrate Salesforce with external middleware, ensuring secure and reliable data exchange.
- Implemented REST callouts using Named Credentials for seamless and authenticated API communication.
- Ensured code security and compliance through CRUD/FLS checks, input validation, and platform encryption for sensitive data.
- Used Salesforce Code Analyzer and PMD tools to identify and resolve performance and security issues, improving overall code quality.
- Designed and maintained asynchronous processes using Queueable and Future methods to handle large data volumes efficiently.
- Collaborated with the team to prepare the MortgageX Salesforce app for AppExchange packaging (2GP) and deployment, adhering to Salesforce best practices,

Client: PermGuard - Salesforce Permission Management Solution

Role: Salesforce Developer

Domain: Salesforce Security / Permission Management

- Designed and developed a Salesforce application to manage and analyze user permissions, roles, and sharing rules across the organization.
- Built custom logic using Apex to evaluate permission sets, profiles, and role hierarchy.
- Developed Lightning Web Components (LWC) to provide a user-friendly interface for permission monitoring and management.
- Implemented features to identify excessive permissions and improve access control visibility.
- Ensured adherence to Salesforce security best practices and optimized performance of permission analysis processes.
- Performed static code analysis using Salesforce Code Analyzer to ensure code quality and security compliance.
- Participated in preparing the managed package for Salesforce AppExchange distribution, including listing documentation and configuration.

Client: MoneyBee - USA

Role: Salesforce Developer

Domain: Salesforce B2C Commerce Cloud

- Developed and customized customer-facing storefront components to enhance online shopping experiences and user engagement.
- Built responsive and interactive user interfaces to support product browsing, customer registration, and checkout-related workflows.

- Integrated external systems and third-party services using REST APIs for payment processing, customer verification, and order management.
- Developed custom business logic to support customer onboarding, order processing, and promotional campaigns.
- Implemented scalable asynchronous processes and optimized application performance to handle high-volume customer transactions.
- Worked on customer account management, self-service capabilities, and personalized user experiences.
- Participated in deployment, testing, bug fixing, and production support activities using Git and Salesforce deployment tools.

Client: Monte Nido - USA

Role: Salesforce Developer

Domain: Healthcare / Behavioral Treatment

- Customized Salesforce Health Cloud to enable patient case tracking, appointment scheduling, and interaction history across providers.
- Built Apex triggers and classes to automate client onboarding workflows, therapy session logging, and case updates.
- Designed and developed Lightning Web Components (LWC) for counselors to monitor patient metrics, treatment outcomes, and history.
- Migrated and optimized legacy Process Builders into streamlined Flows, improving system performance and alignment with Salesforce best practices.
- Created custom objects and record types to support specialized behavioral health workflows and treatment plans.
- Developed test classes and ensured consistent code coverage for all Apex components.
- Used Salesforce DX, VS Code, and GitHub to manage source control and deployment pipelines.
