PROJECTS

Project Name: Environment and Social Data Management (E&S)

Role: Technical Consultant

Environment/Tools: MS D365 Online, VS.

Description: The Bank collects data from clients to assess the environmental and social risks of carrying out an engagement with a client. The outputs from this data collection are monitored throughout the lifecycle of a project and may become part of the contractual agreement for the engagement. Funding has been secured via the Multi-Year Investment Plan (MYIP) to resolve the current capacity issues by development of the following technical capability:

- Digitized E&S Due Diligence Questionnaires (pre-signing due diligence)
- Digitized Annual Environmental & Social Report (project monitoring)
- Digitized Environmental & Social Action Plan (contractual compliance)

EDUCATION

M.C.A | MUMBAI | SEP

14

Environment: MS D365 Online, VS.

Description: The main objective of this solution is to handle the donation process.

Multiple donors provide donations to EdelGive firms. Whereas different NGOs are there, those who need this donation will raise the request to claim this donation. Handling scoping stages where EdelGive team tries to onboard a new NGO by entering the basic details along with required documents which are then approved by finance and Compliance team. Once NGO completes sign up process, NGO's can access the portal and update their KYC details. This way, NGOs can claim donations.

Role and Responsibilities:

- Using OOB components, create custom entities, views, and relationships.
- Write plugins, workflows, and JavaScript.
- Custom HTML pages for portal to handle NGO KYC document upload process.
- Attended meeting with user for requirement gathering.
- Prepare test cases.
- Performed unit testing and bug fixes.

Project Name: Maxbupa Health Insurance Management

Role: Technical Consultant

Environment: MS D365 Online, VS.

Description: The main objective of this solution is to handle sales and service modules.

Handling policy products (Health Recharge, Health Premia, Health Companion, Heartbeat, Reassure etc). Calculation of premium using plugins.

Role and Responsibilities:

- Using OOB components, create custom entities, views, and relationships.
- JavaScript, Plugin, and Console Application development.
- Power automates to handle the activities (appointment, email, phone call)
- Performed unit testing and bug fixes.

Project Name: Edelweiss Tokio Life Insurance Co. Ltd (ETLI)

Role: Technical Consultant

Environment: MS D365 Online, VS.

Description: The main objective of this application is to handle the sales process. While creating contact in CRM, duplication is checked based on various parameters.

Role and Responsibilities:

- Using OOB components, create custom entities, views, and relationships.
- Write plugins, workflows, and JavaScript.
- Power automates to handle dedupe functionality
- Performed unit testing and bug fixes.
