

PRIYA

DevOps Engineer | AWS | Azure | GCP | Kubernetes | Terraform | CI/CD | SRE

PROFESSIONAL SUMMARY

DevOps Engineer with 6+ years of experience in designing, implementing, and managing scalable cloud infrastructure across AWS, Azure, and GCP environments.

Expertise in Kubernetes administration, CI/CD automation, Infrastructure as Code (Terraform), cloud migrations, and DevOps best practices for highly available enterprise applications. Proficient in Azure DevOps, Jenkins, Docker, Helm, GitOps, ArgoCD, and Monitoring & Observability tools with strong experience in automating deployments, optimizing cloud infrastructure, improving system reliability, and supporting zero downtime production environments through SRE and automation practices.

KEY ACHIEVEMENTS

- Improved deployment speed by 40% through CI/CD automation and GitOps workflows.
- Enhanced deployment reliability by 30% using Terraform and Infrastructure as Code practices.
- Successfully managed 1000+ cloud and virtual machine environments across AWS, Azure, and VMware.
- Delivered zero downtime cloud migration projects for enterprise applications.
- Improved application performance by 25–35% through infrastructure optimization and auto scaling.
- Automated repetitive operational activities reducing manual effort and improving productivity.

TECHNICAL SKILLS

DevOps & Automation

Terraform, Ansible, Packer, Docker, Kubernetes, Helm, GitOps, Git, ArgoCD, Jenkins, Azure DevOps (ADO), Jira, GitHub Actions, CI/CD Pipelines, Maven, SonarQube, Nexus, Shell Scripting, PowerShell, Python, Bash, Prometheus, Grafana, Linux Administration, Splunk, New Relic, Zabbix, Rancher, Docker Swarm, Agile/Scrum Methodologies, SRE Practices.

Microsoft Azure

Azure Virtual Machines, AKS, Azure DevOps, Azure Monitor, Log Analytics, Application Insights, Azure Key Vault, Azure Firewall, VNets, NSGs, Load Balancers, Azure SQL, App Services, Azure Functions, Azure Site Recovery, Azure DMS, Hub-Spoke Architecture, Traffic Manager, Front Door, Bastion, VPN Gateway, ARM Templates, RBAC, Azure Governance, Azure Migration.

Amazon Web Services (AWS)

EC2, VPC, IAM, ALB, NLB, Auto Scaling Groups, S3, RDS, DynamoDB, Lambda, CloudFormation, CloudWatch, Route53, ECS, EKS, Fargate, CodeBuild, CodeDeploy, CodePipeline, AWS Organizations, Transit Gateway, Security Groups, NACL, CloudTrail, Systems Manager, GuardDuty, AWS CLI, Cost Optimization.

Google Cloud Platform (GCP)

Compute Engine, GKE, Cloud Storage, Cloud SQL, Cloud Functions, Cloud Run, Pub/Sub, Cloud Build, Cloud Monitoring, Cloud Logging, Secret Manager, VPC Networking, Cloud NAT, Load Balancing, Artifact Registry.

PROFESSIONAL EXPERIENCE

DevOps Engineer

Project : US-Based E-Commerce

Project Description:

Designed and implemented CI/CD pipelines and managed highly scalable e-commerce applications supporting authentication, cart, orders, payments, and notifications using microservices architecture deployed on Kubernetes platforms, ensuring high availability, security, auto scaling, and zero downtime deployments.

Roles & Responsibilities:

- Designed Azure DevOps YAML pipelines for Java and Node.js applications improving deployment efficiency by 40%.
- Built multi-stage CI/CD pipelines integrating build, testing, SonarQube scanning, artifact publishing, and automated deployments.
- Automated AKS deployments using Helm Charts, ArgoCD, and GitOps workflows across DEV, QA, UAT, and PROD environments.

- Provisioned Azure infrastructure using Terraform including AKS clusters, VNets, NSGs, Storage Accounts, and Azure Key Vault.
- Managed Kubernetes clusters including node pools, ingress controllers, workload scaling, auto scaling, and cluster upgrades.
- Develop reusable Ansible playbooks and roles for provisioning, patching, deployments, and configuration management.
- Integrated Azure Key Vault with Azure DevOps pipelines for secure secrets and credential management.
- Implemented monitoring and observability solutions using Prometheus, Grafana, Azure Monitor, Log Analytics, and Application Insights.
- Performed zero downtime deployments using rolling updates, blue-green deployments, and canary release strategies.
- Managed Azure resources including RBAC, governance policies, networking, subscriptions, and security compliance.
- Collaborated with development teams to optimize build pipelines and reduce deployment failures.
- Supported SRE activities including production monitoring, incident management, RCA, and reliability improvements.
- Automated operational tasks using Python and Shell scripting improving operational productivity.

Cloud DevOps Engineer

Project : US-Based Retail & Supply Chain Enterprise

Project Description:

Worked on Enterprise E-Commerce & Supply Chain Scaling and Azure Cloud Migration Program, supporting large-scale AWS to Azure and On-Premises to Azure migrations for enterprise applications and modern cloud-native workloads

Roles & Responsibilities:

Conducted Azure Cloud Readiness Assessments including VM sizing, dependency mapping, and network analysis.

- Executed AWS to Azure and On-Prem to Azure migration projects with minimal downtime.
- Migrated 50+ production servers using Azure Migrate and Azure DMS.
- Designed Azure Landing Zone architecture with RBAC, governance, and Hub-Spoke

networking.

- Implemented secure networking using NSGs, Azure Firewall, VPN Gateway, and WAF.
- Containerized applications and deployed workloads on AKS and EKS clusters.
- Configured Kubernetes auto scaling, ingress controllers, and network policies.
- Automated health checks, monitoring, and operational tasks using Python scripting.
- Implemented monitoring solutions using Azure Monitor, CloudWatch, Grafana, and Log Analytics.
- Improved application performance through infrastructure optimization and auto scaling.
- Optimized AWS and Azure cloud costs through resource rightsizing and cleanup activities.
- Performed production support, RCA, blue-green deployments, canary releases, and SRE activities.

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate
 - Certified Kubernetes Administrator (CKA) – CNCF
 - Microsoft Azure Administrator Associate (AZ-104)
- Anthropic Academy – Prompt Engineering & Generative AI Fundamentals

EDUCATION

Bachelor of Commerce (Computers) Andhra University – 2019
