

BHAVANI

JAVA DEVELOPER, 8+

Summary:

- Having 8 years of experience in Full Stack Development. Having Strong Technical Knowledge in Angular UI Development. Experience in UI development using HTML 5, SCSS, JS, TS, Angular, Bootstrap, Angular Material, Prime NG, JSON, React.js, Java, Spring Boot, Hibernate Framework, SQL, Kafka, Microservice.
 - Excellent Problem Solving and Analytical Skills
 - Good interpersonal skills, committed, result oriented, hard working with a quest and zeal to learn new technologies
 - Extremely strong communication skills. Responsible for the development of re-usable services and user interfaces. Proficient with version control, preferably GIT, BitBucket, Jira & TFS Working knowledge of frontend optimization and performance techniques
 - Makes design recommendations towards the development of new code or reuse existing code.
 - Basic knowledge in Reactive Extensions (Rxjs) operators.
 - Skilled in code organization, re-factoring, re-usability and best practices
 - Having strong Knowledge in working with Angular modules, services, templates, directives, services and dependency injection and custom pipes, directives to create a SPA.
 - Hands on Experience on Angular CLI (Command line Interface).
 - Good amount of work done on Reactive forms in Angular and their Validations.
 - Expertise creating user validation forms and sending data to server using RESTful services.
 - Extensive Work Experience in ECMAScript (5 and 6), Typescript
-

SKILLS

Languages: HTML 5, CSS 3, JavaScript, Typescript, ECMAScript (5,6), Bootstrap, Angular, 9, 10 Restful API, Web Services, Java-8, Springboot and Microservices.

Framework and

Tools: Angular , Jquery IDE Tools Visual Studio Code , Notepad++

PROJECTS

ACA E-Comms

Duration: Aug 20224 to Till Now

ACA E-Comms is a comprehensive e-commerce web application designed to streamline the online purchasing process for both customers and administrators. The platform enables users to browse products, add items to the cart, place orders, and track deliveries. Administrators can manage inventory, handle user queries, and generate analytical reports to monitor sales and performance. The system integrates a secure backend API with a dynamic and responsive front-end interface, ensuring a smooth and efficient user experience. Developed a speech-to-text processing module to facilitate seamless data entry and retrieval, enhancing user experience and operational efficiency.

Environment: Html, CSS, Bootstrap, JavaScript, Typescript and Angular 4. Micro Frontend Archit, Angular Material. >Bit bucket and Jira Software

Operating System:

Windows XP, Windows 7 & Windows 10

Domain Knowledge:

Finance and Banking
,Health Care,
Agricultural, Facility
Management System

EDUCATION

Degree Of Bachelor of
Mathematics (BCA)

MYSOMATUS

May 2022 to Aug 20224

Myxomatosis is a HealthCare Project and the main modules involved is Admin and user. From Admin site we can able to control the users portal. Involved in UI development using HTML5, CSS3, JavaScript, Type Script, Angular 14 and bootstrap. Used NPM for installing required node modules and other published Angular NPM modules. Worked Extensively with Angular CLI for creating components, Services, pipes, Directives. Worked on some of the features like ng-templates, Reactive form validators, subject & Behaviour subject, Rxjs operators. Used JSON for data exchange between client and server. Involved in working with the QA to assist in preparing check out list and debugging the defects in the application. Attending the scrum calls and Release review calls for every pre-release. Used JIRA to keep track of bugs to reduce downtime, increase productivity, and Communication

Environment: HTML 5, CSS 3, JavaScript, Angular 14, Typescript, Angular Materials.

TOOLS: Git, GitHub, Sonar Lint and Jira Software

UDS EMS

Duration: June 2020 to May 2022

UDS EMS is mainly developing for Maintain the Man power details, Machine details, Material details and Employee details. Responsibilities: Involved in UI development using HTML5, CSS3, JavaScript, Angular 7 and PrimeNg. Involved in whole Life Cycle of the project. Construct a powerful and modern frontend architecture, involving ECMAScript and Typescript. Used Browser Storage(Local and Session) to store & retrieve insensitive user data during transition between the different pages Key team member in agile development team with ability to flex according to business needs. Experience in Scrum methodology and understanding of team member role and definition of done

Environment: HTML 5, CSS 3, JavaScript, Angular 10 and 11,Java ,SprintBoot, MicroServices,SQL Prime-Ng and Maverick.

Smart IoT Device Management and Monitoring Platform

Duration: Fed 2019- June 2020

Led the frontend development using Angular 17 (Standalone components) with Bootstrap 5 and Angular CDK Overlays for dropdowns, modals, and tooltips.Built Create Device Type and Create Device Profile components with dynamic form generation and custom validation logic.Integrated CesiumJS for advanced geofence visualization, supporting both polygon and circular zones with multiple persistent layers.Used RxJS for handling complex asynchronous streams, and NgRx Store & Effects for global state management of device data.Developed backend microservices using Node.js (Express) and MongoDB, enabling efficient CRUD operations and RESTful API communication.Implemented real-time device telemetry updates using WebSocket (Socket.IO).Designed role-based dashboards for administrators, technicians, and supervisors, with access control using RBAC principles.

Environment: Angular 17, RxJS, NgRx, TypeScript, Bootstrap 5, CesiumJS, HTML5, SCSS, Java, SpringBoot, MongoDB, Redis (for caching) jasmine, Karma, Postman. Git, Jenkins, Docker, VS Code, Figma

Enterprise Administration Workflow System

Duration: May 2018 to Feb 2019

Designed and developed dynamic, modular Angular 17 components with Bootstrap 5 and Angular CDK for enhanced UI responsiveness. Implemented Reactive Forms with complex validations, dynamic field rendering, and real-time error handling. Integrated NgRx Store & Effects for state management, enabling consistent and scalable data flow between UI and backend. Developed RESTful APIs using Node.js (Express) and MongoDB, ensuring secure data communication and CRUD operations. Implemented Role-Based Access Control (RBAC) to handle user authorization and route-level access restrictions. Created reusable UI modules like DynamicTableComponent and Advanced Filter Component to support multiple entities (e.g., Device, Employee, Geofence). Configured CI/CD pipeline using Jenkins and GitHub Actions to automate deployment and unit testing.

Environment: HTML 5, CSS 3, JavaScript, Angular 10 and 11, Java, SpringBoot, MicroServices, SQL Prime-Ng and Maverick. Git and Jira Software and AWS.
