

SURYABHAN

QA Automation Test Lead | Agile Expert | Automation & QA Process Innovator

📞 9599471344 @ suryabhanadv265@gmail.com 🌐 www.linkedin.com/in/suryabhan-kr-kushawah-7926228b

📍 Noida

PROFESSIONAL SUMMARY

QA Automation Test Lead with 11+ years of experience in automation testing, test strategy, QA leadership, and enterprise-level quality engineering. Specialised in designing robust automation frameworks using Selenium, RestAssured, Java, Python, Appium, Jenkins, AWS, SQL, and CI/CD pipelines. Proven expertise in reducing manual effort by **70%**, improving test coverage by **100%**, and delivering high-quality releases across multiple large-scale projects. Strong background in **Agile, SDET practices, UI & API automation, microservices testing, and cross-functional team leadership**.

EXPERIENCE

Senior Automation Test Lead

Samin TekMindz India

📅 02/2025 - Present 📍 Noida

- Designed and implemented a complete automation framework using Selenium and Java from scratch.
- Managed and mentored a team of QA engineers across multiple projects.
- Led test strategy, test design, and execution across Development, SIT, and UAT phases.
- Achieved 75% reduction in manual testing efforts via advanced automation and process optimization.
- Conducted daily Scrum, Sprint Planning, Sprint Demo, and Retrospectives.

Senior Test Lead

Lepton Software

📅 06/2024 - 02/2025 📍 Gurgaon

- Tracked the quality throughout the software development, building and testing routing protocols, and managing teams of QA Engineers
- Create an automation framework using Selenium WebDriver from scratch with Java and Python
- Test all aspects of database testing with SQL, MySQL, and Oracle as well as ETL testing
- Analyzed all aspects of the product/system like function/component, system, performance, regression, and service
- Generated test strategy design and test cases for various stages of transformation projects (Development, SIT, UAT)
- Controlled the Software Test Life Cycle, applied Quality Assurance (QA) resulting in saving 70% of manual efforts
- Facilitated Daily scrum, Sprint Planning, Sprint Demo, & Sprint retro meetings

QA Automation Test Lead

Acidaes Solutions

📅 05/2022 - 06/2024 📍 Noida

- Applied the quality throughout the software development, building and testing routing protocols, and managing teams of QA Engineers
- Evaluated all aspects of the product/system like function/component, system, performance, regression, and service
- Supervised all activities for the Release Engineering and Quality Assurance groups
- Established test strategy design and test cases for various stages of transformation projects (Development, SIT, UAT)
- Controlled the Software Test Life Cycle, Executed Quality Assurance (QA) resulting in saving 60% of manual efforts
- Facilitated Daily scrum, Sprint Planning, Sprint Demo, & Sprint retro meetings
- Prepared technical documentation for code and design changes, and debugging, monitoring, and troubleshooting end-user applications

KEY ACHIEVEMENTS

Technical Award at Intellect Design Arena Limited

Received 1 technical Award at **Intellect Design Arena Limited** for exceptional performance in quality assurance and testing.

Efficiency Improvement

Lead a team to achieve 70% reduction in manual efforts.

QA Process Enhancement

Implemented QA processes improving test coverage by 100% across projects.

Project Management Success

Directed 10+ projects ensuring timely delivery and budget adherence.

STRENGTHS

Quality Assurance and Project Management

Strong expertise in quality assurance, project management, and effective team leadership, with the ability to deliver high-quality software solutions while promoting Agile methodologies.

Team leadership skills

Expert in leading QA teams.

Agile expertise

Proficient in Agile methodologies and practices.

Automation proficiency

Successfully reduced manual testing by automating processes.

Quality-focused mindset

Committed to continuous improvement and quality assurance.

EXPERIENCE

Sr. Consultant

Intellect Design Arena Limited 07/2018 - 05/2022 Gurgaon

- Devised Quality Assurance (QA) and release management processes to support developers and Quality Assurance (QA) staff across mission-critical software solutions
- Observed, Automating, and testing materials, processes, and products to meet quality specifications
- Delivered software solutions consistent with the product roadmap, release plan milestones, and KPIs
- Analyzed all teamwork performance, setting KRA, and ensuring the achievement of all objectives within required deadlines
- Accomplished quality assurance human resource objectives by recruiting, selecting, orienting, training, assigning, scheduling, coaching, counseling, and disciplining employees

Sr. Test Engineer

Devstringx Technologies 04/2016 - 07/2018 Noida

- Monitored the quality throughout the software development, building and testing routing protocols, and managing teams of QA Engineers
- Tested all aspects of the product/system like function/component, system, performance, regression, and service
- Supervised all activities for the Release Engineering and Quality Assurance groups
- Created test strategy design and test cases for various stages of transformation projects (Development, SIT, UAT)
- Controlled the Software Test Life Cycle; implemented Quality Assurance (QA) resulting in saving 60% of manual efforts
- Facilitated Daily scrum, Sprint Planning, Sprint Demo, & Sprint retro meetings

Software Engineer

OSN INFOTECH (INDIA) 01/2014 - 03/2016 Noida

- Created test strategy, design, and cases for SIT and UAT.
- Executed functional, component, regression, and service testing.
- Coordinated release management and QA activities.

PROJECTS

Lifecycle of electric vehicle (EV) charging stations

02/2025 - Present

Lifecycle of electric vehicle (EV) charging stations

- A comprehensive platform designed to streamline and manage the lifecycle of electric vehicle (EV) charging stations.
- Collaborated with stakeholders to define project scope, requirements, and deliverables.
- Led cross-functional teams through Agile methodology to ensure timely delivery.
- Defined user flow, user stories, Epics, and functional requirements for core features.

Smart Inventory (Telecom) Software

06/2024 - Present

Smart Inventory is a telecom network inventory management software that helps businesses optimize their operations by providing real-time tracking, reporting, and control of fiber network assets

- Gathering Business requirements and configuring Jenkins set up, defining, and scheduling jobs, invoking external scripts, and external executables triggered from Jenkins at defined intervals
- Managing all Quality Assurance and Testing functions
- Facilitated Scrum implementation, Scrum Practices, and Agile Methodologies
- Facilitating API Testing, System Testing, Regression Testing, and Acceptance Testing
- Logging defects in the bug tracker tool, prioritizing the bugs & tracking them until closure
- Leading the team of automation testers to meet the product goals and thereby achieving the organizational goals

SKILLS

Agile methodologies		API Testing		
Appium (Mobile App Automation)		SQL		
Database Testing		Security Testing		
Load Testing	Automation Testing		AWS	
Azure DevOps	Bit Bucket	BrowserStack		
CI/CD	Confluence	Figma		
Client Management		Cucumber		
ETL Testing		Functional Testing	Git	
GUI	IOS	Android	Java	Jenkins
JIRA	JMeter	Linux	Manual Testing	
Maven	Python	Test Planning		
Rest assured		Selenium	Windsurf AI	
Burp suite		MySQL	ETL Validator	
Playwright		Cypress	Postman	
TestRail		Zephyr	Swagger	
BDD Architecture		Xray	POM	

EDUCATION

B.Tech

Dr. A. P. J. Abdul Kalam Technical University (UPTU)

08/2009 - 08/2013

Lead Management

📅 05/2022 - 06/2024

Automatically captures leads and customers from multiple channels, including keyword-driven lead creation, and fulfills the sales pipeline commitments to customers.

- Gathering Business requirements and configuring Jenkins set up, defining, and scheduling jobs, invoking external scripts, and external executables triggered from Jenkins at defined intervals
- Managing all Quality Assurance and Testing functions
- Facilitated Scrum implementation, Scrum Practices, and Agile Methodologies
- Facilitating API Testing, System Testing, Regression Testing, and Acceptance Testing
- Logging defects in the bug tracker tool, prioritizing the bugs & tracking them until closure
- Leading the team of automation testers to meet the product goals and thereby achieving the organizational goals

NGage

📅 07/2018 - 05/2022

N Gage is a loyalty application which is designed and developed on the API-based mechanism which makes it reliable to integrate any POS.

- Understanding the System Requirements Specification and Business Logic
- Creating infra (Integration Jenkins, AWS, Git, Docker, BrowserStack, JIRA)
- Facilitated Agile Methodology, and took part in Release Planning and Sprint planning meetings
- Creating automation test scripts and collecting test data
- Implementing TestNG, Maven, Java, Cucumber, and Selenium Web driver to develop an automation framework
- Running Cross-browser testing run tests against the various browsers
- Estimating testing to deliver project releases as per the scheduled deadlines
